

Geography Crew

Yo yo yo it's the geography crew

We are here to tell you what

Tectonic plates do

There's a motion in the ocean

Causing a commotion

We are using this this rap as a super cool promotion

It's an underwater technology

The name is seismology,

We're not here to mess around

It's all about the ocean sound

Finding, plates sliding gliding colliding

It's helping us to find out more all about the ocean floor
