Earthquakes

The make the earth shake
They make the plates break
You might think it's fake.

When two plates meet
The ground moves under your feet
It causes a vibration
Which depends on your location
An epic sensation
They send out seismic waves
You'll feel it unless you're at a rave
In which case, I hope you behave.

Earthquakes

They make the earth shake
They make the plates break
You might think it's fake.

The buildings will fall
Better move from that wall
The ground will shake
Your bones might even break
Stay away from the fault
If you don't just halt
And then most importantly
Move around carefully.

Earthquakes

They make the earth shake

They make the plates break

You might think it's fake.

Earthquakes create havoc

Make you fall off your hammock

Trees will cover the road

Cars will have to be towed

Creates a land mass

Or shatters glass

Wait till it's over

Don't call your friends over

Earthquakes

They make the earth shake

They make the plates break

You might think it's fake.
