

Verse 1:

Plate Tectonics, plate tectonics, plate tectonics.

Volcanoes and earthquakes too,

Convection currents and magma too.

No more Pangea, no more dinosaurs.

Verse 2:

Volcanoes, volcanoes, volcanoes.

Magma rising through,

Convection currents, under the plates.

That's why plates move!

Verse 3:

An inner core and an outer core,

Mantel and crust too.

These are the layers of the earth

And can get get up to 7000 degrees.

Verse 4:

Earthquakes occur when plates slide bye,

Fold mountains are formed,

When one goes under and plates collide

That's plate tectonics, that's plate tectonics.
