

## Seismology

Seismology, the study of shockwaves is important considering earthquakes. Buildings collapsing, homes destroyed. You're lucky there's workers happily employed.

All these clever people, yeah, measuring the ocean waves, they don't know how many people's lives they have saved.

From the fault lines to the focus to the shockwaves hittin' the surface, every bit recorded to keep us safe.

But still, they need some encouragement. They need support 'cause of the work they put towards it. We made this rap from scratch you see, in the hope we can explain Seismology.

All these clever people, yeah, measuring the ocean waves, they don't know how many people's lives they have saved.
