

1st paragraph

Song: *The Prince Bel air [THEME SONG]*

Now this is a story all about how to measure earthquakes and save your life
So we'd like to take a minute just sit right there
And I'll tell you all about what's down in there

2nd paragraph

Song: *Maps, Maroon 5*

When you want to measure the shaking ground
You use a seismograph
When the ground starts to shake and quake
The instrument case moves and that'll mean
There's an earthquake coming
There's an earthquake starting
You better start running
You better start hiding
And I wonder how you know
How you know there's an earthquake down there
Well you use a seismograph
But I wonder what it does
Well it measures all the waves from the earthquake
And the bigger they are the are more dangerous
They're really dangerous
Unless they're really small
But they're still dangerous
(dangerous, dangerous, dangerous)

3th paragraph

Song: *Shape of you, Ed Sheeran*

A seismograph is a good instrument for measuring earthquakes
You bring them out to sea and then you lay them on bedrocks
Come over here and see all the diagrams being made
You know we keep them on our boat till we get back to base
And now we're singing like....

4th paragraph

Song: *Wannabe, Spice Girls*

Now imma tell you how do it from your bed
You got to buy some tech to help you prepare
We gotta set em' in the place
And lock it with your grace

It'll record everything
And every minor ring

5th paragraph = Conclusion

Song: The Cup Song

Now you know how to measure an earthquake
You got to use a seismograph
And you put it in the sea
And wait for it to move
That's how you measure with a seismograph
When it moves`
When it moves
You better get your loved ones cause there's an earthquake
And get protected right away
